INDUSTRY EXPERIENCE

Optum AI labs

Jun '23 -Sept '23

Built continuous and passive estimation of risk in Type 2 diabetes mellitus (T2DM) subjects using Continuous Glucose Monitoring data. The estimation is then used in a sampling-based algorithm to design and deliver mobile interventions.

Samsung Research America, Digital Health Lab

May '22 - Sep '22

Designed a framework to extract heart-rate variability features from Samsung's digital health devices. Detecting stress using this proposed framework on human subjects with reference sensors undergoing validated stressor tasks.
